

Kanishka Gupta

Pune, Maharashtra

+91 9996780184 | kanishkagupta0402@gmail.com

Skills

Frontend Development: JavaScript, React.js, Tailwind CSS, TypeScript, HTML, CSS

Backend Development: Node.js, Java, Python, Spring Boot, Flask, Express.js

AI / Machine Learning: Machine Learning, Generative AI, NLP Basics, AI Automation

Databases: MySQL, MongoDB, Firebase, Firestore, Google Cloud

Version Control: Git

Experience

SYNERGYLABS

Gurugram

Web developer Intern

Jun 2025 – August 2025

- Developed **frontend using React.js, Tailwind CSS, and TypeScript**, building responsive Admin and User Dashboards.
- Integrated **backend services** to ensure smooth functionality and seamless data flow in [imagine.bo](#).
- Worked on **AI-focused** prompt testing, prompt optimization, and scenario-based validation to improve user experience.
- Implemented **streaming features, API handling, and site map generation** to enhance performance and navigation.

Education

Bharati Vidyapeeth College Of Engineering , Pune

Bachelor's of Technology, GPA(till 5th Sem): 8.90

2023-2025

Projects

Airline Reservation Website | Machine Learning, React.js, Node.js, MongoDB

[Project Link](#)

- Developed a **full-stack airline reservation** platform with authentication, flight booking, and seat selection.
- Integrated **Machine Learning-based recommendation** features to improve booking experience and personalization.
- Built responsive frontend using **React.js** and **Tailwind CSS**.
- Designed **backend services** for real-time booking management and flight data handling.
- Used **MongoDB** for efficient storage and management of customer and flight information.

Music Recommendation System | Machine Learning, React.js, Node.js, Firestore

[Project Link](#)

- Developed an **AI-driven music recommendation web application** providing personalized song recommendations.
- Built a **recommendation engine** using user preferences and previously liked songs.
- Integrated **Firestore** database for efficient management of user data and recommendation analytics.
- Implemented **search functionality** and responsive UI using React.js.
- Enhanced recommendation accuracy using **popularity-based and similarity-based** filtering techniques.

Telecom Customer Churn Prediction | Python, Machine Learning

- Developed **Machine Learning** models to predict customer churn and identify high-risk customers for retention strategies.
- Performed data preprocessing, **feature engineering**, dimensionality reduction, and exploratory data analysis.
- Implemented **Logistic Regression** and **XGBoost** models, improving **ROC-AUC** score and recall performance.
- Analyzed customer behavior, recharge patterns, ARPU trends, and service usage to generate business insights.
- Built an end-to-end **AI/ML workflow** including data cleaning, training, evaluation, and prediction.

AI Video Generation Tool | Python, Generative AI

[Project Link](#)

- Built a **Generative AI-based automation** tool that converts trending news and social media topics into short-form videos.
- Implemented **AI-powered script generation** pipelines for automated content creation.
- Generated 30–60 second videos using **AI-generated scripts, images, and text overlays**.
- Automated **video sequencing** and content generation workflow using **Generative AI tools**.

Hobbies

- Painting
- Yoga and Meditation
- Social Work

Achievements

- **Java Programming Certification – NPTEL**
- **Database Management System – NPTEL**
- **100 Days of Code – Udemy**
- **Machine Learning Certification – YHills**
