

Software Engineer (Backend - Java/Spring Boot)

Job Description

Location

Pune, India

Experience

2–5 Years

Employment Type

Full Time

About the Role

We are looking for a Software Engineer to design, develop, and maintain scalable backend applications. The candidate will work closely with frontend developers, QA engineers, and product managers to build high-quality software solutions.

Key Responsibilities

- Develop REST APIs using Java and Spring Boot.
- Build scalable microservices.
- Design and optimize MySQL databases.
- Write clean, maintainable, and testable code.
- Collaborate using Git and Agile methodologies.
- Troubleshoot application issues and improve performance.
- Participate in code reviews.

Required Skills

- Java
- Spring Boot
- REST APIs
- Microservices
- MySQL
- Git
- Maven
- JUnit

Preferred Skills

- Docker
- Kubernetes
- AWS or Azure
- Redis
- Kafka

Education

Bachelor's degree in Computer Science, Information Technology, or a related field.

Soft Skills

Problem-solving, communication, teamwork, analytical thinking, and willingness to learn.
